

Dear Art Lover,

Welcome to *A Vacant Passage*, an exhibition of paintings by Paul Senyol & Andrej Urbanski with interactive content...

A VACANT PASSAGE

Interactive Art Exhibition

21 September – 12 October

There is a beautiful synergy that exists between **Paul Senyol [Zar] & Andrzej Urbanski's [Pol/Ger]** paintings. *A VACANT PASSAGE* is the story of two artists traveling and leaving behind remnants and legacies, expressed through powerful uniquely abstracted artworks. Works on exhibition include medium to large-scale paintings from monochrome black and white, to beautiful hues of colour on paper and on canvas, as well as a number of collaborative works. The exhibition also features a unique AUGMENTED REALITY aspect. By downloading free QR & AR reader software to Iphones, Android Phones, I pads & Blackberries, viewers can access virtual content such as video interviews with the artists, and other material, which provide deeper insight into the artists & the works on show.

The exhibition flyer, the exhibition shopfront display, and some of the artwork labels and artworks themselves are layered with digital content, which allow you, the viewer, to interact with all these elements in order to learn more about the exhibition and the artists.

Important Visitor Information:

For **Iphone, Ipad & Android phones**: Download the Layar app before visiting the show: <http://get.layar.com>. You can also scan the QR code below in order to download the Layar app. If you do not have a QR reader we recommend installing one. All works containing augmented reality content are marked with the AR icon. Scan with Layar and enjoy.

Blackberry users: Download a QR scanner application. All artworks containing interactive content are marked with a different QR code. Scan and enjoy.

If you have any problems please approach a gallery representative and we will assist wherever possible.

Thank you,
The Salon91 Team
